

LD-N1 putty spray machine

LD-N1 plastering machine is a small-size, dry-mixed transfer pump, which is suitable for materials less than 2mm, such as putty, paint, coating materials and things alike. LD-N1 can be your spraying machine if it is equipped with our small-size air compressor, spray gun or relative accessories.

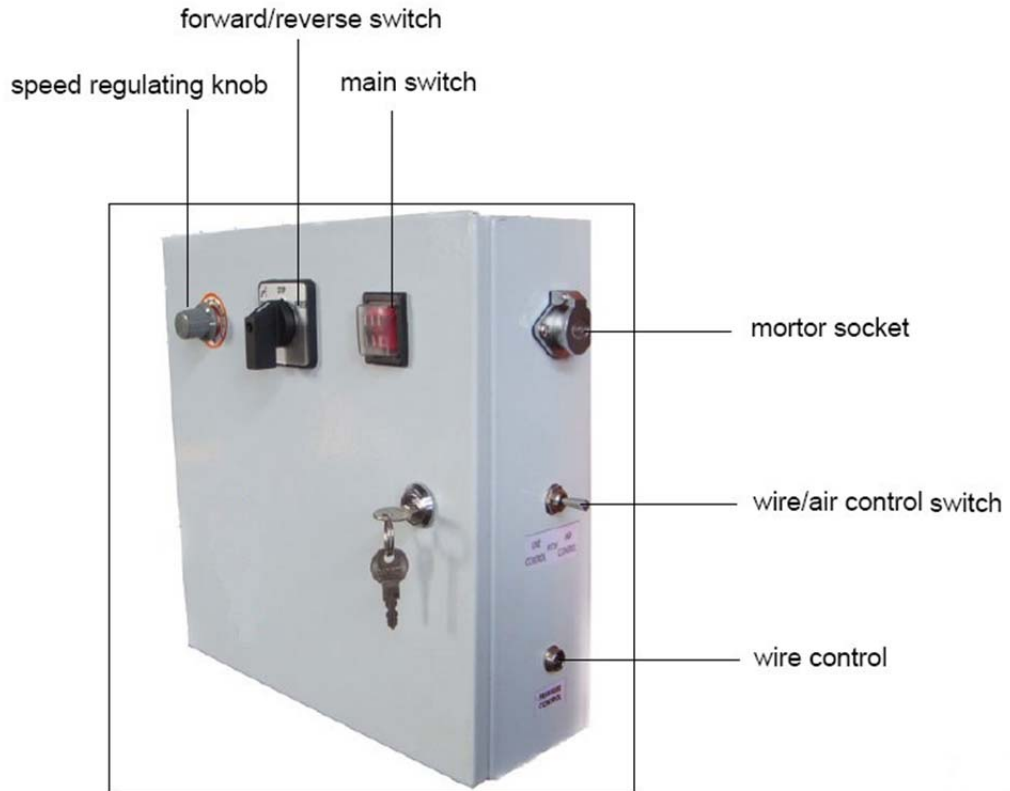

LD - N1 is composed of many independent components. The volume and handy design facilitate the transportation of the machine.

Model	LD-N1
Voltage	220V
Motor power	1kw
Conveying pressure	20bar
Conveying distance	1-30m
Conveying height	3-15m
Spraying pipe	50m
Air pump	0.3Nm ³ /min
Nozzle caliber	3/4/5/6mm
Tank Capacity	50 L
Output	17 L/min
Compressor	2.2 kW, 350 L/min
N.W./G.W.	145 kg/165 kg
Measurement	1250*650*1400 mm

Electric Box Overview

A complete set of LD-N1

No.	Name
1	shaft connector
2	high pressure gun and hose
3	hopper
4	quick connector
5	control box
6	15m high pressure air hose
7	air pump
8	pump motor
9	twister
10	screw pump
11	retarder
12	pump motor

Rotor, stator
(pump core)

Mixed gas gun

High pressure gun
