

LGH70&LGH90 High-Pressure Grouting Pump

LEC Hydraulic drive grouting pump are a universal high-pressure grouting pump and is used for grouting in soil, earth foundation stabilization, waterproofing, tunnel lining, underwater foundations, bridge decks, deep well casing, slope line grouting, etc.

- Single piston with double-acting.
- Hydraulic drive
- Compact structure
- Ball valve

Specification :

Item	LGH70	LGH90
Rated Output	0-70 L/Min	0-100 L/Min
Rated Pressure	10MPa(1450PSI)	10MPa(1450PSI)
Cylinder Dia.	110mm	110mm
Stroke/Minute	31	45
Inlet Dia.	38mm	38mm
Outlet Dia.	32mm	32mm
Power Unit	7.5kW	11kW
Transmission	Hydraulic drive	Hydraulic drive
Chassis	Skid	Skid
Weight	500Kg	600Kg
Overall Dimension	1600x800x1120mm	1600x800x1120mm
Note: Single or Double Passageway are optional; Chassis: Skid or Tyre
